

AI-monitored cameras record the movement of *everyone* without evidence of any crime. They are actively being used to chill speech, stalk women, violate your Fourth Amendment rights and empower ICE & DHS.

Many communities have already pushed them out and yours can, too.

ALWAYS WATCHING

**WHERE YOU GO
WHAT YOU DO
WHO YOU'RE WITH**

Automated License Plate Readers (ALPRs), also known as Flock cameras have been installed in your neighborhood, at your expense.

These devices photograph every vehicle that passes, logging your license plate, location, time, and direction of travel without a warrant, and without your consent.

Your movements paint an intimate portrait of your life. This data is stored and sold to thousands of paying customers. No guardrails can ever protect it from abuse.
